Contents

January 2024 Volume 27 Issue 1

Editorials

1 OPEN ACCESS Time to treat the climate and nature crisis as one indivisible global health emergency

4 EDITOR'S CHOICE Nurse identity: the misrepresentation of nursing in the media

Research made simple

6 EDITOR'S CHOICE Induction, deduction and abduction

Evidence for nurse education

8 Strategies to improve and enhance satisfaction with learning among nursing students

Commentaries

Women's health and midwifery

10 It is time for healthcare professionals to engage with social media

11 Cardiomyopathy and pregnancy: a high-risk combination

12 Prison is a barrier to high-quality, comprehensive midwifery care

13 Increased prevalence of chronic medical conditions linked to higher rates of adverse perinatal outcomes in Dutch women

14 We need more evidence to inform community-based health services for women, and transgender and nonbinary people who experience incarceration

Health promotion and public health

15 Extreme temperatures are associated with increased cardiovascular mortality

16 Antimicrobial Resistance Collaborators (2022). Global burden of bacterial antimicrobial resistance in 2019: a systematic analysis

17 Minimum Unit Pricing in Scotland 32 months on: evidence demonstrates a significant reduction in alcohol related deaths

18 Prolonged screen time in adolescence linked to higher cardiometabolic risk in adulthood

19 EDITOR'S CHOICE Step your way to a longer life: examining the relation between step counts, morbidity and mortality

Nursing issues

20 A call to all nurses from transgender people: treat me as a whole person; I am more than my gender identity

21 Strategies to integrate culturally and linguistically diverse nurses into foreign healthcare systems: it's everybody's business

22 Starting at the top: culture change has the potential to advance the patient participation agenda in Iranian hospitals

23 Rotating shifts are associated with an increased risk of work-family and family-work conflicts and with decreased work-related quality-of-life

Child health

24 Birth cohort study indicates the impact of COVID-19 pandemic on early child language development

25 Diffusion of paediatric long-term ventilation as a reflection of changing clinical scenarios and practice

26 Impact of the COVID-19 pandemic on eating disorder-related hospital and programme admissions in youth

Adult nursing

27 Early rehabilitation of patients in the ICU may reduce long-term healthcare costs

28 Innovative and evidence-informed technology-based assessment can facilitate comprehensive cancer rehabilitation by improving cancer care outcomes through personalised nurse-led follow-up interventions

Workforce issues

29 Advanced Clinical Practitioners (ACPs) have a significant impact on patient outcomes and healthcare services

Mental health

30 eHealth interventions can potentially provide cost-effective and accessible support for stress-related problems in healthcare professionals

31 Understanding staff perceptions on adolescent seclusions

32 Vigorous exercise in pragmatic settings leads to antidepressive, metabolic and cardiovascular health benefits in adult outpatients with major depression or anxiety disorders

Intellectual disability nursing

33 Enhancing behavioural support through telehealth for family carers and professionals

34 Cardiometabolic profile of young adults with intellectual disability

35 Sibling carers of adults with intellectual disabilities in Ireland report high levels of health but feel overwhelmed by care responsibilities

Care of the older person

36 Communication between families and hospital staff is important in understanding nutrition and hydration problems in dementia patients

37 Evidence-informed and community-based strategies are essential to developing affordable and accessible technology-based interventions to prevent social isolation among older adults and promote their well-being and quality of life

38 Home fall hazard assessments effective in high-risk fallers but more information needed on effects of assistive technologies

39 Preoperative functional performance is the best predictor for loss of independence after major surgery among older adults

Palliative care

40 Cultivating rapport in telehealth: insights from palliative care
