

Evidence-Based Nursing

Evidence-Based Nursing is designed to alert practising nurses to important and clinically relevant advances in treatment, diagnosis, causation, and prognosis. By applying strict criteria for the quality and validity of research, Evidence-Based Nursing selects and examines every aspect of the very best international nursing research for your practice. These essential studies are presented as an expert commentary on its clinical application.

Editor

Alison Twycross (UK)

Subscription Information

Would you rather read 25,000 articles or 96?

An enormous amount of work goes on behind the scenes to make sure that *Evidence-Based Nursing* provides you with all the information you need. We scan over 140 journals and around 25,000 articles each year so that we can identify the 96 most important and valid research articles. This means that if you read *Evidence-Based Nursing*, you'll get all the important research material you need in just four issues, saving you time to concentrate on other things. So for time-saving, distilled research information, make sure you subscribe to *Evidence-Based Nursing*.

Evidence-Based Nursing is published quarterly
