# Evidence-Based Nursing

## Contents

**Editorial**  
97 Nursing and midwifery council registration for overseas children’s nurses: a perfect storm?

**Research made simple**  
98 Ethnography: challenges and opportunities

**EBN Opinion**  
101 Critical care nursing: caring for patients who are agitated

**EBN perspective**  
104 Adult Nursing

**Women’s health and midwifery**  
107 Inactivated influenza vaccination in first trimester does not appear to increase risk of birth defects

**Adult nursing**  
108 Individualised assessment is required to establish the most appropriate anticoagulation option for patients  
109 Mobile phone messaging delivering encouragement, reminders and education increases patient compliance with recommended exercise and results in positive short-term health behaviours  
110 Patient self-testing and self-management of anticoagulation is safe and patients are satisfied with these programmes

**Child health**  
112 Father-infant skin-to-skin contact appears to be beneficial, however paternal experiences of this need to be explored  
113 Skin-to-skin care is an effective and safe intervention to reduce procedural pain in neonates

**Nursing issues**  
114 Parenting concerns, parental identity and functional status influence medical treatment decisions of patients with advanced cancer  
115 Cognitively impaired patients with heart failure may not perceive weight gain as a risk for decompensation

**Care of the older person**  
117 Risk of injury higher in older adults with dementia than in those without  
118 Pain-related palliative care challenges in people with advanced dementia call for education and practice development in all care settings  
119 Frailty significantly increases the risk of fractures among middle-aged and older people  
120 High-dose monthly vitamin D3 can help to prevent acute respiratory infections in older long-term care residents, but may increase risk of falls

**Nurse education**  
122 Simulation training appears to improve nurses’ ability to recognise and manage clinical deterioration

**Community and primary care nursing**  
124 Healthcare providers need to address misconceptions young women have around IUDs and their fertility

**Resources**  
125 Resources page

**Correction**  
121 Correction: Community-based exercise interventions during pregnancy are perceived as a satisfactory and motivating form of exercise engagement
