## Contents

### Editorials

- 31 Enough is enough: time for change in pain education?
- 32 Interprofessional learning interventions: championing a lost cause?

### EBN Opinion

- 34 Rethinking pain education

### Perspective

- 36 Communication technology and healthcare

### Research made simple

- 39  Reviewing the literature: choosing a review design

### Women's health and midwifery

- 42 Internet-based programmes on weight loss appear to be effective for low-income postpartum women

### Adult nursing

- 43 The impact of haemodialysis on patient's cognitive, physical and emotional well-being requires further study
- 44 Nurse education needed to address uncertainties of role and contribution in stroke rehabilitation units

### Child health

- 45 School nurses are able to support adolescents experiencing pain secondary to stress and unhealthy lifestyle choices
- 46 There is an urgent need for evidence-based internationally agreed guidelines for the assessment of neonates at risk of developing early-onset sepsis

## April 2018 Volume 21 Issue 2

- 47 Education needed to enhance inclusive, non-discriminatory nursing practice towards lesbian, gay and bisexual parents
- 48  Morphine is not superior to ibuprofen for managing children's pain following minor orthopedic surgery

### Nursing issues

- 49 Excess mortality associated with weekend hospital admissions may be due to patient-level differences, rather than reduced staffing or services
- 50  Non-opioid analgesia is as effective as opioid management in acute pain and supports a change in prescribing practice to help address the 'opioid epidemic'

### Care of the older person

- 51 Engaging in even a small amount of walking is associated with lower mortality in older adults
- 52 Increased physical activity in older adults is associated with decreased fear of falling
- 53 Deprescribing in nursing homes is safe and should be pursued

### Nurse education

- 55 Web-based educational intervention improves enrolled nurses' knowledge and performance with deteriorating patients

### Learning disabilities

- 56 Hospital passports require standardisation to improve patient safety and person-centred care for those with intellectual disability

### Resources

- 57 Resources page
