

Evidence-Based Nursing

Contents

Purpose and procedure	2	Review: insufficient evidence exists for any one dressing type (used beneath compression) for venous leg ulcer healing.....	21
EBN notebook		Similar proportions of patients developed pressure ulcers on alternating pressure overlays and alternating pressure mattresses	22
Why fair tests are needed: a brief history	4	Economics	
Of studies, syntheses, summaries, and systems: the “5S” evolution of information services for evidence-based healthcare decisions.....	6	Alternating pressure mattresses were more cost effective than alternating pressure overlays for preventing pressure ulcers	23
Star ratings—a new feature coming soon to <i>EB Nursing!</i>	8	Causation	
Treatment		Review: good adherence to drug therapy is associated with reduced mortality.....	24
Review: antibiotics are effective for acute purulent rhinitis but are associated with increased gastrointestinal side effects	9	Quality improvement	
Immediate or delayed prescribing of antibiotics reduced duration of symptoms in acute infective conjunctivitis	10	Review: case management and team changes are particularly effective strategies for reducing HbA _{1c} concentrations in type 2 diabetes.....	25
Review: exercise improves glycaemic control and reduces plasma triglycerides and visceral adipose tissue in type 2 diabetes	11	Audit and feedback and educational outreach did not differ from printed educational materials for improving community nursing practice	26
Review: regular exercise improves quality of life and physical fitness in women with breast cancer.....	12	Qualitative	
Review: various interventions prevent or reduce oral mucositis in patients with cancer receiving chemotherapy or radiotherapy	13	Oral and written information about newborn screening should be concise and given to parents by primary prenatal care providers.....	27
Review: sparse good quality evidence supports the use of alternative therapies for menopausal symptoms	14	Children as young as 4 years of age with type 1 diabetes showed understanding and competence in managing their condition.....	28
Review: sparse evidence supports non-pharmacological interventions for preventing wandering in people with dementia	15	Children of mothers with breast cancer were distressed by hair loss; those >10 years of age wanted more information about their mother’s condition.....	29
Review: a low protein diet delays end stage renal disease or death in chronic kidney disease	16	Community nurse behaviours related to patient involvement in decision making varied on a continuum of non-involving to involving	30
Review: evidence from ≤2 low quality studies suggests no difference in surgical site infection with or without preoperative hair removal; depilatory cream and clipping are better than shaving	17	Patients with cancer used numerical information to calculate the odds and mobilise their coping responses	31
Review: double gloving during surgery prevents perforations of the inner glove, but its effect on infection is unknown	18	Men treated for prostate cancer did not consider urinary, bowel, or sexual dysfunction as problems of health.....	32
Oral decontamination with chlorhexidine reduced ventilator associated pneumonia in patients needing mechanical ventilation for ≥48 hours.....	19	Glossary	Inside back cover
Paraffin ointment or mupirocin ointment did not differ from no ointment under moist occlusive dressings on non-contaminated surgical wounds for wound infections	20
