Contents

Editorial

- 33 Advance care planning in an acute care world

Research made simple

- 34 What is grounded theory?

Resources

- 36 EBN Resources page

EBN opinion

- 41 The expert patient

Women's health

- 43 Women find safety planning more useful than referrals in a maternal and child health IPV intervention

Midwifery

- 44 A third of midwives who have experienced traumatic perinatal events have symptoms of post-traumatic stress disorder
- 45 Fever during pregnancy linked to child motor development
- 46 Chewing gum after caesarean section stimulates the gastrointestinal system

Adult nursing

- 47 Intermittent pneumatic compression is effective in reducing proximal DVT
- 48 How experienced intensive care nurses communicate with families about shift to end-of-life care

Child health

- 49 Handwashing and nail clipping reduce risk of intestinal parasite infection in school-age children

April 2016 Vol 19 No 2

- 50 Being overweight in infancy predicts overweight in childhood regardless of infant feeding method
- 51 Parents' preferences on pain treatment, even when faced with medication dilemmas, influence their decisions to administer opioids in children

Nursing issues

- 53 Assessing beyond vital signs to detect early patient deterioration
- 54 Authentic leadership influences work-life coping in new nurses
- 55 Simulation versus lecture? Measuring educational impact: considerations for best practice
- 56 Suffering in silence: the core theme for older parents of adult children with cancer
- 57 Language barriers may put patients at risk during daily hospital care
- 58 Support for presence during cardiopulmonary resuscitation if it is a child or relative, though views differ by gender
- 59 What 'a good death' means for bereaved family carers
- 60 Provision of preoperative and postoperative information increases the likelihood a person will be fully prepared for home recovery
- 61 Culturally and linguistically diverse healthcare students can find integration into clinical placements
- 62 Nurse-led early discharge planning for chronic disease reduces hospital readmission rates and all-cause mortality

Care of the older person

- 63 Familiarity and understanding of patients' religiosity and faith influence the level of comfort nurses and care workers feel when providing care
- 64 An elastic band exercise programme improves functional fitness in older adults
