## Contents

### Editorial

- 93 Is it really bursary or bust? Simon Stevens stirs the pot

### Research made simple

- 95 What are cohort studies?

### EBN opinion

- 97 Co-creation and co-production in health service delivery: what is it and what impact can it have?

### EBN perspective

- 101 EBN perspectives: nursing issues

### Commentaries

#### Learning disabilities

- 105 Tai Chi, Wii Fit and rope skipping exercise interventions are particularly effective in improving balance for young people with intellectual disabilities

#### Child health

- 106 Using draw-and-tell methods to inform clinical nursing assessments with children aged 6–12 years
- 107 Childhood obesity is associated with higher incidence of paediatric onset asthma
- 108 Supporting rural nurses to develop and implement a contextualised, systematic approach to paediatric pain management is vital to improve pain care for children

#### Adult nursing

- 109 Select groups of older adults may benefit from emergency-based short-stay unit admission, as compared to standard medical admission
- 110 Harm-benefit analysis: treatment of mild hypertension in low-risk individuals

## October 2019 Volume 22 Issue 4

### Mental health

- 111 Study of electronic records from a south London psychiatric trust suggests that the increased mortality from physical illness linked to depression varies between ethnic groups
- 112 Antidepressant discontinuation can be problematic for patients but relapse rates might be reduced with cognitive behavioural therapy or mindfulness-based cognitive therapy
- 113 Anger treatment has a therapeutic effect on cardiac function and productive living

### Women's health and midwifery

- 114 Chronic skin disorders negatively impact women's quality of life and sexual function

### Care of the older person

- 115 Should aspirin be used for primary prevention in the healthy elderly?
- 116 Higher risk of physical frailty in older person is associated with increased levels of loneliness rather than social isolation

### Nursing issues

- 117 Visualising the invisible; why cleaning is important in the control of hospital-acquired infection

### Community and primary care nursing

- 118 Increased risk of recurrent *Clostridium difficile* infection among older adults taking antibiotics and acid reducing medications

### Health promotion and public health

- 119 Study shows lower vaccination rates for younger siblings after autism spectrum disorder diagnosis in older siblings
- 120 Relational communication characteristics are an important facet of building effective practitioner–patient care relationships
