## Contents

### Editorial

- 33 Student mental health and well-being: are universities doing enough?

### Research made simple

- 35 Research made simple: developing complex interventions

### Resources

- 38 Resources page

### EBN Perspective

- 40 Dementia care and treatment issues

### EBN opinion

- 43 Young people taking responsibility for self-management: when is the ideal time?

### Commentaries

#### Nurse education

- 46 Nurse educators must demonstrate care, competence and integrity to enhance students' trust in them

- 47 Professional socialisation processes help facilitate the transition from student to qualified nurse

#### Adult nursing

- 48 Increased knowledge of oral anticoagulants and treatment satisfaction leads to better adherence to oral anticoagulants in patients with atrial fibrillation

- 49 Best practice for peripheral intravenous catheter replacement

- 50 Living a life, not an illness: the process of living well with advanced cancer

- 51 Undiagnosed delirium is common and difficult to predict among hospitalised patients

- 52 ITU patients with delirium did not benefit from electronic and pharmacist support encouraging the deprescribing of benzodiazepines and anticholinergics

## April 2020 Volume 23 Issue 2

### Mental health

- 53 The usage of coercive measures in psychiatric units and its potential counter-therapeutic impact on outcome

### Women's health and midwifery

- 54 Learning to love: shunning conventional stereotyping of giving birth to a baby with an abnormality

- 55 Behavioural and pharmacological interventions are more effective than no treatment for urinary incontinence outcomes in women

### Care of the older person

- 56 Hospital admission may increase the risk of potentially inappropriate prescribing among older primary care patients

- 58 Quality of life among older adults with Alzheimer's disease in residential care: who knows best?

### Nursing issues

- 59 Access to specialist palliative care to manage pain in people dying at home: give them a VOICE

- 60 Intensive decontamination of emergency department surfaces is required to prevent spread of methicillin-resistant *Staphylococcus aureus* from actively colonised patients

- 61 Study finds medication errors common after Intensive Care Unit transfer

- 62 Incidence and prevalence of medical device-related pressure ulcers in children and adults

### Health promotion and public health

- 63 Increased intake of omega-3 during pregnancy can reduce preterm births

- 64 Fragmented health and well-being services as contributing barriers in overcoming the unmet needs of a population with special needs
