Editorial

- 1 Nurse identity: reality and media portrayal

Research made simple

- 6 What are Photovoice studies?

Evidence for nurse education

- 8 Impact of COVID-19 on nursing students' mental health: a systematic review and meta-analysis

Commentaries

Adult nursing

- 10  Organisational support improves adherence to infection prevention and control guidelines
- 11 Dynamics of patient adherence with their cardiovascular treatment plans
- 12 Perceptions and comorbidities interfere with self-efficacy and medication adherence in patients with type 2 diabetes mellitus
- 13 Critical care survival rates in COVID-19 patients improved as the first wave of the pandemic developed
- 14 Best practices to prevent delirium in hospitalised patients

Care of the older person

- 15 Malnutrition is a significant predictor of hospitalisation outcomes among older adults with sepsis
- 16 Ineffectiveness and safety concerns of using aspirin and other NSAIDs in preventing dementia
- 17 Depression and social isolation are associated with loneliness among seniors with mild-to-moderate dementia—findings from the IDEAL cohort study
- 18 Diagnosis, gender and age predict context of care provision for older adults towards the end of life

Community and primary care nursing

- 19 Nurses' awareness of diverse healthy diets may increase patients' adherence improving cardiovascular disease risk management
- 20 Initiation of palliative care in the last 6 months of life can reduce the frequency of healthcare use and burdensome interventions for people with both cancer and non-cancer diagnoses

January 2022 Volume 25 Issue 1

Health promotion and public health

- 21 Understanding health disparities among LGBTQ populations and future needs
- 22 Clear, consistent and credible messages are needed for promoting compliance with COVID-19 public health measures
- 23  Inequities still exist in the use of digital health technology across different sociodemographic subgroups

Learning disabilities

- 24 Enriching outcomes for persons with intellectual disabilities: choice, individuality and collaboration are key to effective eHealth

Mental health

- 25 Exploring differing participation in community cultural activities, mental well-being and socioeconomic factors: analysis of the Taking Part Survey
- 26 Treating and preventing common mental health conditions in involuntary migrants: gaps and opportunities for research
- 27 Understanding loneliness among older populations in context of depression
- 28 Effect of grief on ageing populations' physical and mental well-being

Nurse education

- 29 Trustworthiness sparks resilience in nursing education

Nursing issues

- 30 Home care environments are not adequately catered for by existing infection prevention guidelines
- 31  Developing nurse-friendly digital technology can enhance its use in healthcare
- 32 International nurses and midwives require individualised support for successful transition to work in the UK
- 33 Hope is a crucial factor for patients facing cancer treatment

Women's health and midwifery

- 34 Prenatal depressive and anxiety symptoms identifying predictors and psychosocial risks
- 35 Risk of aspirin among pregnant women
- 36 Characteristics and outcomes of pregnant Black and minority ethnic women admitted to hospital with confirmed SARS-CoV-2 infection in the UK
