## Contents

### Editorial

- 37 Impact of COVID-19 on nursing students: what does the evidence tell us?

OPEN ACCESS

### Resources

- 39 Resources page

### Research made simple

- 41 Researching sensitive topics in healthcare

EDITOR'S CHOICE

### Research opinion

- 44 In the room where it happens: in-person or remote data collection in qualitative research?

### Evidence for nurse education

- 46 Effectiveness of flipped classroom techniques in nurse education

### Commentaries

#### Adult nursing

- 48 Intensive care nurses should seek to identify those patients at risk of developing post-traumatic stress syndrome
- 49 Sleeping-related distress in a palliative care population: influence of symptom clusters
- 50 Qualitative synthesis of research on healthcare providers' perceptions of the transition from in-patient to community palliative care
- 51 Mechanically ventilated patients experience stress and feelings of vulnerability
- 52 Efficacy of non-pharmacological treatments of fatigue in individuals with end-stage disease

#### Care of the older person

- 53 Examining patterns of frailty and associated factors in older adults
- 54 Meta-analysis exploring poststroke aphasia profiles and language recovery
- 55 Frailty as part of the disablement process: calling for health economic interventions
- 56 Emotional supportive care for first-degree relatives of deceased people with COVID-19: an important but neglected issue
- 57 Simple preoperative frailty screening may identify older people with increased needs for discharge planning post surgery

## April 2022 Volume 25 Issue 2

### Child health

- 58 Multidisciplinary intervention highly effective in decreasing restraint use in paediatric acute care
- 59 Treatment escalation for children with exacerbations of asthma—what works? An overview of Cochrane Reviews

### Health promotion and public health

- 60 Increase disparities in breast cancer screening uptake for women with anxiety disorders
- 61 Implementation of public policies as a strategy to increase adherence to immunisation against COVID-19
- 62 Teenage pregnancy strategy in England: new perspective on effectiveness: a commentary
- 63 Evidence-informed and targeted public health interventions are required to reduce the broader behavioural health impact of loneliness and social isolation due to the COVID-19 pandemic
- 64 Evidenced-based and targeted interventions are required to enhance compliance with COVID-19 public health measures

EDITOR'S CHOICE

### Mental health

- 65 Depression and age groups in the UK population: implications for public health preventive strategies
- 66 Specialist services for people with young-onset dementia (YOD) are associated with better postdiagnostic care quality and satisfaction

### Nursing issues

- 67 Non-infectious complications of peripheral venous catheters are common
- 68 Targeting personalised leadership factors based on the organisational needs of nurses may cultivate and improve their nursing leadership
- 69 Patient-facing healthcare workers and their families have a higher risk of hospital admission with COVID-19 than the general population
- 70 Context-specific technology-based solutions may reduce the risk of preventable medication harm across healthcare settings

### Women's health and midwifery

- 71 Psychological trauma in postpartum women who experienced maternity care during the stringent COVID-19 pandemic restrictions
- 72 Intimate partner violence educational programmes may improve healthcare professionals' knowledge of and readiness to respond to women's experiences of violence

### Miscellaneous

- e1 Correction: *What are sensitivity and specificity?*
