

Evidence-Based Nursing

Evidence-Based Nursing is designed to alert practising nurses to important and clinically relevant advances in treatment, diagnosis, causation, and prognosis. By applying strict criteria for the quality and validity of research, Evidence-Based Nursing selects and examines every aspect of the very best international nursing research for your practice. These essential studies are presented as an expert commentary on its clinical application.

Write for EBN

Evidence-Based Nursing is looking for authors to write commentaries. Authors need not have a PhD, but they should have experience writing papers. We are also happy to commission less experienced authors if you have a more experienced colleague you can write with. Authors will ideally be nurses or midwives, but other healthcare professionals may register their interest. See <https://ebn.bmj.com/pages/write-for-us/> for more details.

Subscription Information

Would you rather read 20,000 articles or 100?

An enormous amount of work goes on behind the scenes to make sure that *Evidence-Based Nursing* provides you with all the information you need. We scan 100 journals and over 20,000 articles each year so that we can identify the 100 most important and valid research articles. This means you'll get all the important research material you need in just 4 issues, saving you time to concentrate on other things. So for time-saving, distilled research information, make sure you subscribe to *Evidence-Based Nursing*.

Evidence-Based Nursing is published quarterly, each issue includes a number of commentaries and additional content.
