## Contents

### Editorial

- 81 Maternal inequality: scoping the threats and reflecting on our opportunities to affect positive change

### Research made simple

- 84 What is a scoping review?

### Evidence for nurse education

- 86 Enhancing collaboration through interprofessional learning

### Commentaries

#### Women's health and midwifery

- 88 Evaluating women's experiences of labour pain: beyond a generic pain scale
- 89 Discrimination during childbirth among black birthing people predicts postpartum care utilisation
- 90 Experiencing perinatal mental health difficulties as a non-birthing mother in a female same-sex couple: a wider reflection on heteronormative cis-gendered care in maternity services

#### Health promotion and public health

- 91 Individuals with autism are at a higher associated risk of developing cardiometabolic diseases

#### Nursing issues

- 92 Managing patients' pain while preserving sleep quality and efficiency
- 93 Looking after people with mental health and/or substance misuse problems in emergency departments is not easy
- 94 Engaging nurses in developing generative artificial intelligence-based technologies can enhance their work motivation, engagement and satisfaction
- 95 Primary care identification of mental health issues in adults with learning disabilities requires screening measures, practitioner training, collaboration and raising awareness in this population

#### Child health

- 96 Prehospital transfusion in paediatric trauma can improve patient outcomes: further research and collaboration is needed to increase availability and appropriate application
- 97 Influence of the COVID-19 pandemic on early child development: exploring individual variations, nursery daycare quality and parental depression
- 98 Children with prolonged fever are more likely to harbour serious bacterial infections
- 99 Shared decision-making instead of physician-led end-of-life decision-making for children with life-limiting conditions

- 100 Understanding the association between COVID-19 and new-onset diabetes in children, including diabetic ketoacidosis (DKA)

#### Adult nursing

- 101 Holistic care is a key research priority for chronic musculoskeletal pain: findings from an evidence and gap map

## July 2024 Volume 27 Issue 3

- 102 Patients with diabetes mellitus are more likely to present without typical chest pain during a myocardial infarction

- 103 Cessation of driving has important psychosocial implications for people living with young-onset dementia and their families

- 104 Emerging evidence for nurse-led interventions in patients with systemic lupus erythematosus and systemic sclerosis

- 105 Enhancing arthroplasty rehabilitation: mobile application-based programs are acceptable and potentially feasible

- 106 Improving delirium detection with the 3D-CAM: a path towards enhanced patient outcomes

#### Mental health

- 107 Study findings suggest the benefit of immediate debriefing for nurses in inpatient acute mental health following seclusion room interventions to reflect on practice and improve patient care

- 108 Impact of the internet on everyday life: experiences of a clinical sample of adolescents with problematic internet use

- 109 Managing multimorbidity in midlife may reduce the risk of developing dementia as we age

- 110 To treat suicidality and impulsivity in bipolar disorders, inclusive, effective and evidence-based psychological interventions should be developed

- 111 Qualitative study of forensic psychiatric nurses' experiences of delayed decisions on involuntary treatment

#### Nurse education

- 112 Video is an invaluable tool for attaining psychomotor skills in nursing
- 113 Minority ethnic student nurses cannot see themselves in senior roles and why it matters!
- 114 Positive attitude does not automatically lead to increased genetic and genomic literacy
- 115 Alignment of intrinsic and extrinsic motivators are required to encourage nurse educators to remain in academia
- 116 Rigorous simulation design grounded in best practice reduces learner anxiety

#### Care of the older person

- 117 What matters the most to the older person is pain care provision that is cost-effective

#### Community and primary care nursing

- 118 Putting insomnia to bed: nurse-led insomnia therapy is effective in primary care
- 119 Use of technologies by nursing improves adherence to hypertension treatment

#### Palliative care

- 121 Navigating the complexities of family resilience in cancer care: unearthing key determinants
- 122 Unmet needs for terminally ill patients without cancer receiving specialist palliative care
