

# Evidence-Based Nursing

## Contents

<b>Purpose and procedure</b> .....	66
<b>EBN users' guide</b>	
Evaluation of studies of assessment and screening tools, and diagnostic tests.....	68
<b>Treatment</b>	
Chlorhexidine reduced catheter tip colonisation more than 10% povidone-iodine in critically ill neonates .....	73
A semi-demand feeding protocol reduced time to full oral feeding in healthy preterm infants .....	74
Telephone based peer support increased duration of breast feeding in primiparous mothers .....	75
Review: behavioural interventions plus laxatives are effective for defecation disorders in children, but biofeedback does not add benefit .....	76
Inactivated influenza vaccine is safe for children and adults with stable asthma .....	77
Review: evidence does not support the effectiveness of over the counter preparations for acute cough .....	78
Verbal advice plus an information leaflet reduced antibiotic use in patients presenting with acute bronchitis .....	79
Review: evidence is incomplete on the benefits and risks of commonly used herbal medicines.....	80
Review: primary care counselling improves short term but not long term psychological symptoms in patients with psychological and psychosocial problems .....	81
Supportive expressive group therapy did not prolong survival in metastatic breast cancer.....	82
Effects of hormone therapy on health related quality of life in postmenopausal women with CAD differed according to presence of menopausal symptoms .....	83
A preoperative smoking intervention decreased postoperative complications in elective knee or hip replacement.....	84
Intravenous fluid replacement minimised dehydration during sodium picosulphate bowel preparation for colonic surgery.....	85
Review: music as a single session intervention reduces anxiety and respiratory rate in patients admitted to hospital .....	86
Review: longer bed rest does not prevent more postpuncture headaches than immediate mobilisation or short bed rest.....	87
Enteral nutrition reduced postoperative complications but increased minor adverse effects in gastrointestinal cancer ..	88
<b>Causation</b>	
Review: breast cancer is associated with a family history of the disease in first degree relatives .....	89
<b>Clinical prediction guide</b>	
A simple risk index accurately predicted mortality in patients with ST elevation myocardial infarction.....	90
<b>Qualitative</b>	
Mothers of infants in neonatal nurseries had challenges in establishing feelings of being a good mother.....	91
People at high risk for STDs used a variety of primary and secondary prevention strategies.....	92
People with enduring mental health problems described the importance of communication, continuity of care, and stigma.....	93
Public health nurses used 4 strategies to facilitate client empowerment.....	94
Gate keeping and legitimisation were central in the interactions between informal carers of older people and healthcare workers .....	95
Older people perceived health as <i>going and doing something meaningful</i> .....	96
