

# Evidence-Based Nursing

## Contents

<b>Purpose and procedure</b> .....	2	Review: enteral nutrition reduces infections, need for surgical intervention, and length of hospital stay more than parenteral nutrition in acute pancreatitis.....	19
<b>EBN notebook</b>		Review: topical NSAIDs reduce pain in osteoarthritis only during the first 2 weeks of use.....	20
Of studies, summaries, synopses, and systems: the "4S" evolution of services for finding current best evidence .....	4	Review: paracetamol reduces pain in osteoarthritis but is less effective than NSAIDs .....	21
Contribution of the <i>Cochrane Library</i> to the evidence-based journals.....	7	Review: adding non-invasive positive pressure ventilation to usual care reduces treatment failure in respiratory failure .....	22
<b>Implementation forum</b>		Review: hospital at home is as effective as inpatient care for mortality and hospital readmissions in patients with acute exacerbations of chronic obstructive pulmonary disease.....	23
Evidence-based quality improvement project for determining appropriate discontinuation of peripheral intravenous cannulas .....	8	Review: evidence from individually randomised trials shows that hip protectors do not reduce hip fractures in elderly people.....	24
<b>Treatment</b>		<b>Prognosis</b>	
Elective surfactant increased median duration of mechanical ventilation in preterm infants with mild to moderate respiratory distress syndrome .....	9	Having a stroke increased the risk of developing dementia in older people.....	25
Review: no evidence exists that paracetamol and ibuprofen differ for short term pain relief or safety in children, but ibuprofen more effectively reduces fever .....	10	<b>Economics</b>	
Review: topical mupirocin or fusidic acid may be more effective than oral antibiotics for limited non-bullous impetigo .....	11	4 layer elastic bandages were more cost effective than multilayer inelastic bandages for healing venous leg ulcers .....	26
Review: a single dose of nasal decongestant reduces congestion in the short term in adults with the common cold; insufficient evidence exists on the effectiveness of repeated doses.....	12	<b>Qualitative</b>	
Review: all forms of nicotine replacement therapy are effective for smoking cessation .....	13	Patients with anxiety and depression wanted to know what to expect when they started their medication ...	27
Review: long term use of common medications for asthma reduces exacerbations in adults.....	14	Patients with chronic asthma found medicine information to be unclear or confusing, did not receive complete information on medicine use and side effects, and found leaflets to be unhelpful .....	28
Review: levonorgestrel and mifepristone are effective emergency methods for preventing pregnancy after unprotected intercourse.....	15	The clarity, timing, and authority of the delivery of a diagnosis of type 2 diabetes had important meaning for patients .....	29
Nebulised lidocaine before nasogastric tube insertion reduced patient discomfort but increased risk of nasal bleeding .....	16	Patients with comorbidities perceived that acute care services did not fully acknowledge or accommodate the comprehensive care that they required.....	30
A nurse led educational intervention for cancer pain management was effective in cancer patients in ambulatory settings .....	17	4 interaction dynamics occurred in telephone counselling for smoking cessation .....	31
Review: chemotherapy plus supportive care improves survival and quality of life in advanced or metastatic gastrointestinal cancer more than supportive care alone .....	18	Older African-Americans with osteoarthritis of the knee preferred to avoid total knee replacement surgery .....	32
